

Customer Support SOP and Macro Pack

Email and chat support playbook for "Parcelnest", a fictional online homeware store. Prepared by Prosync Solutions.

1. Purpose and scope

This document tells any support agent, on their first day, how to handle a ticket from open to close: how fast to reply, how to prioritise, what they can decide alone, when to hand off, and what to write. It covers email and live chat. Phone and social media follow the same rules with the channel notes in section 6.

2. Service levels

Priority	Examples	First reply	Resolution target	Owner
P1 Urgent	Charged twice, order placed with wrong address and not yet shipped, account locked out	1 hour	Same day	Senior agent
P2 High	Damaged or wrong item, parcel marked delivered but missing	4 hours	2 working days	Any agent
P3 Normal	Where is my order, return request, change of delivery date	8 hours	3 working days	Any agent
P4 Low	Product questions, feedback, stock enquiries	24 hours	5 working days	Any agent

Hours are working hours, Monday to Friday 08:00 to 18:00. Live chat first reply target is 2 minutes for all priorities.

3. Ticket workflow

1. Triage

Tag the type, set priority, check for an existing ticket from the same customer.

2. Look up

Open the order. Check payment, shipping status and past contacts before replying.

3. Reply

Use the matching macro, then edit it so it answers this customer's actual question.

4. Act

Do what you promised: refund, replacement, courier claim. Note it on the ticket.

5. Close

Set to Solved only when the action is done, not when the reply is sent.

4. What an agent can decide alone

Situation	Agent can approve	Escalate when
Damaged or faulty item	Replacement or full refund, no return needed under \$60	Item over \$200, or third claim from the same customer
Late delivery	Shipping fee refund once the parcel is 3+ working days late	Parcel 10+ days late: open a courier claim and escalate
Change of mind return	Return label within 30 days of delivery	Outside 30 days, or item used
Goodwill gesture	Discount code up to 10%	Anything above 10%
Payment dispute or chargeback	Nothing. Acknowledge and hand off.	Always, to the finance contact, same day

5. Macro pack

Text in **yellow** is a variable. Every macro is a starting point: read the customer's message again before sending and remove any line that does not apply.

M1. Where is my order (in transit)

P3 · tag: wismo

Hi **first name**,

Your order **order no.** left our warehouse on **ship date** and is with **courier**. The latest scan shows it in **location**, and it should reach you by **estimated date**.

You can follow it here: **tracking link**

If it has not arrived by **estimated date + 2**, reply to this email and I will chase the courier for you.

agent name

M2. Damaged item

P2 · tag: damaged

Hi **first name**,

I'm sorry your **item** arrived damaged. That is not the condition it should reach you in.

I can send a replacement today, or refund you in full. Which would you prefer?

You do not need to return the damaged one. If you have a photo of it and the packaging, please attach it to your reply. It helps us fix the packing problem at our end.

agent name

M3. Return request (within 30 days)

P3 · tag: return

Hi **first name** ,

No problem, you can return **item** . Your prepaid label is attached.

1. Pack the item in its original box if you still have it.
2. Stick the label on the outside and drop it at any **courier** point.
3. Your refund goes back to your original payment method within 5 working days of us receiving it.

agent name

M4. Refund confirmation

tag: refund

Hi **first name** ,

I have refunded **amount** to the **card type** you paid with. Banks usually take 3 to 5 working days to show it.

If you do not see it by **date** , reply here and I will send you the refund reference to give your bank.

agent name

M5. Marked delivered, not received

P2 · tag: missing

Hi **first name** ,

The courier shows order **order no.** as delivered on **date** at **time** , so I understand why it is worrying that you do not have it.

Could you check with neighbours and any safe place around your property? Couriers sometimes leave parcels without a card.

I have also opened a trace with **courier** . If it has not turned up by **date + 2 working days** , I will send a replacement or refund you, whichever you prefer.

agent name

M6. Handing off to a specialist

tag: escalated

Hi **first name** ,

Thank you for explaining. This needs someone from our **team** team, so I have passed your message and order details to them. You will not need to repeat anything.

colleague name will reply by **day and time** .

agent name

6. Tone rules

Do

- Name the specific problem in your first line
- Say what you will do and by when
- Give one clear next step for the customer
- Use the customer's first name and sign with yours
- Keep emails under 120 words, chat replies under 40

Don't

- "We apologise for any inconvenience caused"
- Blame the courier, the warehouse or "the system"
- Promise a date you do not control
- Ask for information that is already on the order
- Close a ticket before the promised action is done

Channel notes. Live chat: reply in short lines, one question at a time. Social media: acknowledge publicly in one line, then move to direct message before asking for an order number. Phone: summarise the call on the ticket within 10 minutes.

7. Quality checklist

A team lead reviews five tickets per agent each week against this list. Each item scores 0 or 1.

#	Check
1	First reply was inside the service level for its priority
2	Priority and tags were set correctly
3	The reply answered the question the customer actually asked
4	The macro was edited, with no leftover variables or irrelevant lines
5	Any refund, replacement or escalation followed section 4
6	The promised action was completed and noted before the ticket was closed
7	Tone followed section 6

8. Weekly report to the client

- Tickets received, solved and still open, by priority
- First reply time and resolution time against target
- Top five contact reasons, with one suggested fix for the biggest
- Refunds and replacements issued, by reason
- Quality score per agent

Sample project created to demonstrate process documentation. Parcelnest is a fictional company, and the service levels and limits shown are example values that would be agreed with each client.
